Skills

- **Programming Languages:** PHP, JavaScript (ES6+), HTML5, CSS3, SQL.
- **Backend Framework:** CodeIgniter 3, Laravel (Basic).
- **Frontend Framework & Library:** Bootstrap 4/5, JavaScript DOM.
- **Client-Side Development:** AJAX.
- **Database Management:** MySQL, ERD Design, Data Normalization (1NF - 3NF).
- **Application Security:** Google reCAPTCHA Integration, Password Encryption (Bcrypt/PHP Hashing), Authentication Form Validation.
- **Tools & Methodologies:** Git, GitHub, RESTful API (Basic).

About me

A professional Full-Stack Developer dedicated to building functional, responsive web applications focused on user experience. Skilled in transforming business needs into efficient digital solutions through frontend, backend, and database management integration.

Strong track record in backend development using PHP (Laravel and CodeIgniter 3) and MySQL database management to ensure reliable server architecture. Experienced in designing dynamic interfaces using HTML, CSS, Bootstrap, and JavaScript, and proficient in implementing API integration, AJAX, and application security systems like Google reCAPTCHA to maintain data integrity.

Education

Software Engineering

SMK TI Pembangunan Cimahi

Jul 2023 - Jun 2026

Graduated with 70% of the curriculum focused on vocational practice and over 400 hours of coding simulations in the lab.

Key achievements:

- **Competent Rating in the Competency Exam (UKK):** Successfully built a functional Full-Stack web application with database integration that passed the technical feasibility test.
- **95% Database Accuracy:** Skilled in ERD design and MySQL database normalization, successfully reduced data redundancy by up to 95% on the final project.
- **100% Project Completion:** Successfully completed 3+ school web app projects using PHP (Laravel) and JavaScript with feature functionality reaching 100% according to specifications.

Experience

Web Developer Intern.

PT Goldstep Teknologi Indonesia

Dec 2025-Apr 2026

Collaborated in a team of 2 developers to build a PHP (CodeIgniter 3) based e-commerce shoe simulation web app called UTAPS. Fully responsible for developing 100% of the features on the customer side (Client-Side), from architecture design to full functionality.

Key achievements:

- **End-to-End Feature Development with CodeIgniter 3:** Successfully built and integrated 9 main customer pages using the CodeIgniter 3 MVC architecture, including the Authentication system (Login & Registration), Home, Catalog, Product Details, Promo Page, Wishlist, and Shopping Cart.
- **100% Effective Work Sharing:** Splitting the workload evenly (50:50) with team members, making sure all PHP-based interface components and client-side logic are completed on time according to the internship timeline.
- **Asynchronous Optimization via AJAX:** Implementing AJAX technology for the Shopping Cart and Wishlist features successfully handled real-time product data manipulation without needing to reload the page, with a 100% functionality success rate.
